S10

The powerful phone that helps you work smarter, wherever you are.

In this fast-paced business world, you need to stay focused and productive. You need a powerful phone that helps you work quickly and efficiently, and stay connected wherever you are. One that lets you carry all your work with you in one device, and keeps your sensitive data completely secure. A phone that lets you capture the world as you see it, then instantly share every detail with colleagues. You need the Samsung Galaxy 10.

Infinity-O Display.

Get more done with a bigger display. Editing complex documents on the move is tricky with a small mobile screen. That's no problem with the Galaxy S10. The large, curved-edge display has no home button or receiver notch, giving you an uninterrupted viewing experience.

Wireless PowerShare.

Share your power. With the Galaxy S10, you can use Wireless PowerShare¹ to bring a colleague's drained phone back to life. You can also use it to charge your wearable. So, if you're out of the office, or travelling for business, you carry fewer cables with you.

Samsung DeX.

Enjoy Samsung DeX by directly connecting the Galaxy S10 to a monitor with a single cable² for a PC-like experience. Access a world of apps and documents optimised to let you work like you do on a PC. You can still use every feature of the Galaxy S10 while you're connected to the big screen.

Ultrasonic Fingerprint Scanner.

The Ultrasonic Fingerprint Scanner is the newest way to keep your phone and information safe. It's highly secure, reading every ridge and notch of your finger. And because it sits under the screen, your finger won't accidentally smudge your rear camera ever again. It even performs in low temperatures and strong sunlight.

Samsung Knox.

The Galaxy S10 is protected by Samsung Knox, our defence-grade security platform built from the chip up. No matter where you go or what you do, you can be sure your business' data stays secure with superior protection that's easy to manage.

1. Wireless charge compatible (Qi standard) devices only. Battery charge above 30% required to PowerShare on the move without being plugged into mains charge. 2. USB-C to HDMI cable and accessories sold separately.
